WORK EXPERIENCE

Software Engineer – Full Stack (Internship → Full-Time)

Aug 2025 – Present

Stabor India(Gurugram, Haryana)

- Contributing to the design and development of scalable backend services using NestJS with a focus on production readiness.
- Implementing real-time communication systems leveraging WebSockets, MQTT, and RabbitMQ for high-performance data exchange. Gaining hands-on experience in distributed systems, protocol-driven architectures, and backend scalability for large-scale applications.
- Working with EV charging protocols (OCPI & OCPP) to enable seamless integration with third-party charging networks and platforms. Collaborating on building end-to-end full-stack solutions, ensuring system reliability, security, and performance.

Intern Front-End Developer, Softech Events (Faridabad, Haryana)

Feb 2025 – July 2025

- Designed and developed responsive, user-friendly interfaces using ReactJS and Tailwind CSS, resulting in a 20% increase in user engagement.
- Built full-stack web applications using Node.js, Express, and MongoDB, with a focus on optimized code and smooth architectural flow across backend and frontend services.
- Implemented efficient state management with Redux, improving overall application performance by 30%. Leveraged the Next.js framework for both server-side rendering (SSR) and client-side rendering (CSR), enhancing SEO performance and user experience across multiple projects.

Intern Web Developer, Aks Interactive (Mohan Estate, Delhi)

Apr 2023 - Aug 2023

- Designed and implemented responsive UI components, leveraging modern CSS and Angular best practices – resulting in a 20% increase in user engagement. Integrated secure and user-friendly authentication flow, significantly improving user experience and reducing friction in onboarding.
- Utilized Redux for efficient state management, enabling consistent data flow and enhanced performance across complex component.
- Developed backend functionalities using PHP, including API integrations and server-side logic, contributing to full stack application delivery.

PROJECTS

Amioz AI-Based Music Platform

(Ongoing Project)

- Developed an AI-based music platform using Langchain, Python, and PineCone, integrated Next.js for server-side rendering. Implemented hugging Face libraries for natural language processing, enabling advanced music creation.

Engineering Works (ReactJS, NodeJS, Express, MongoDB, Tailwind CSS)

[\(Live | GitHub\)](#)

- Developed a full-stack web application using ReactJS, NodeJS, and MongoDB, featuring real-time data visualization and user authentication. Optimized database queries, resulting in a 40% improvement in application response time.

Portfolio Website (React JS, TailwindCSS, Vercel)

[\(Live | Github\)](#)

- Designed and developed a responsive portfolio website using ReactJS and TailwindCSS, showcasing personal projects and achievements. Implemented server-side rendering using Vercel, improving website loading speed by 30%

Blissfull Beds (MERN-Stack, Three.js, GSAP)

[\(Live | Github\)](#)

- Built a 3D web application using Three.js and GSAP, featuring interactive 3D models and animations. Integrated MongoDB with the MERN stack, enabling real-time data storage and retrieval.

ACADEMIC QUALIFICATIONS

Master's in computer application
Vellore Institute of Technology – Online(Pursuing)

Bachelor's in computer applications
The NorthCap University, Gurgaon (2021-2024)

CERTIFICATIONS

- Certified Web Developer, Aks Interactive (2023)
- NPTEL in JAVA Object Oriented problem solving
- UdemY ReactJS Development
- Forage – Walmart Job Simulation – Software Dev. Prog.

SKILLS

- Databases – MongoDB, PostgreSQL, Redis
- Frameworks and Libraries – WebSockets, NestJS, RabbitMQ, REST API, React, Next.js Express, Axios, TailwindCSS, Langchain Development, Fast API
- Programming Languages – TypeScript, JavaScript, Python
- Development Tools – VS Code, GitHub Copilot, MVC Architecture, Dockers, DevOps, AI Integration, Payment Gateway, GitHub, Tailwind CSS
